

To Whom It May Concern:

I understand the National Association of Broadcasters is lobbying to restrict satellite radio broadcasters from broadcasting local traffic and weather. I am a subscriber to XM Satellite Radio and I feel that as an American consumer, I am entitled to pay for these services and I do not feel the NAB should be dictating what XM subscribers can or cannot hear. Furthermore, I am paying this monthly fee so that I do not have to listen to commercial radio which is, well, full of commercials! If the government sides with the NAB, then they are clearly restricting XM's first ammendment rights. I would make any and every attempt to prevent the reelection of any politician who sides with the NAB on this issue. Such a politician would clearly be on the NAB's payroll and obviously would not have the public's interest at heart. Thank you for allowing me to voice my opinion on this issue.

Sincerely,  
David Weissman
